ENGINEER YOUR CAREER

Be a Street Cranexpress engineer

GIVE YOUR CAREER A LIFT

As Managing Director of Street Cranexpress, a family-run 100% British-owned business, I'd like to tell you a little more about working for this very special company.

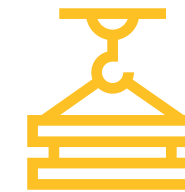

We keep British businesses running, from small workshops to the production lines of the world's industrial giants.

Street Cranexpress engineers combine their knowledge of overhead cranes with mechanical and electrical engineering expertise, to solving our customers' lifting problems.

Be a Street Cranexpress engineer. Read this Prospectus to find out more and if you have any questions, please feel free to contact us at recruitment@sce.co.uk

Ray Fletcher

EXPERTS IN OVERHEAD CRANES

Street Cranexpress engineers specialise in overhead travelling cranes.

Their job is to help keep British production lines rolling. Factories, workshops, garages, and warehouses right across the country rely on overhead cranes to take the effort and risk out of lifting and moving heavy objects.

Our engineers keep those cranes moving thanks to decades of experience in mechanical and electrical engineering, a deep knowledge of lifting systems, and working safely at heights.

EARNING POTENTIAL

Street Cranexpress has a network of crane engineers right across the UK.

Our customers can call on us at any moment to repair a crane, to install new upgrades, to perform vital safety checks, and to plan crane maintenance around their busy production schedules.

This means we need to be flexible, and there are always opportunities to earn extra money by visiting customers outside of normal working hours.

Many of our engineers take full advantage of these enhanced rates of pay. Through overtime opportunities, a Street Cranexpress Service Engineer can earn an additional 40% per year on top of their base salary.

BIG COMPANY BENEFITS

Street Cranexpress is part of the SCE group, a nationally respected engineering group.

Through its two separate companies (Street Cranexpress and bxh Ltd.), the SCE group is famous for keeping British manufacturing moving. From servicing and repair of all lifting equipment to electrical control components that drive machinery.

Being part of a bigger group gives you career progression opportunities, a wide variety of experience, and employee benefits that smaller firms cannot compete with.

Health insurance, a fully expensed vehicle, ongoing training, matched pension, life assurance, flexible working hours, and a paid birthday holiday. All of this contributes to making your working life more enjoyable and productive.

ONGOING TRAINING

| Our commitment to health and safety is paramount.

In this industry, it is vital that our engineers, our customers, and the public are all protected.

Street Cranexpress is a full member of LEEA and has invested in technology to deliver multimedia training online, direct to our engineers' tablets. And when practical training is required, we have the SCE Academy, where engineers can get hands on experience with the latest lifting equipment, tools, and techniques.

We believe that training is a lifetime endeavour. Adding new skills throughout your career is what makes a good engineer an excellent one.

Our younger engineers are also supported by encouraging extra-curricular learning, including LEEA Foundation and Advanced qualifications.

FLEXIBILITY

| Flexibility is important.

We all have a life outside work, and this looks different for each of us. Whether you have family commitments, or other personal circumstances arise, we're here to help.

Our staff in head office will work with you to schedule jobs around important life events, giving you a degree of flexibility, that other firms fail to deliver.

Street Cranexpress knows that supporting you in your commitments allows you to perform better as an engineer, and to deliver the very best service to our customers.

ALL KITTED OUT

| An engineer can only deliver the very best service, in the safest way, with great kit.

All Street Cranexpress engineers are issued with a fully expensed vehicle, plus a tablet and phone to keep you connected on the road. And with workwear that's proudly branded in our company colours, every engineer reinforces our values of reliability and expertise to our customers.

Finally, your equipment for working at height helps you to do the very best job you can for our customers. Safely, quickly, expertly.

WORLD CLASS ENGINEERS, WORLD CLASS CUSTOMERS

Our engineers are already working with some of the UK's biggest brands.

JCB, Bombardier, Hitachi, Toyota, Perkins Engines, BAE Systems, Rolls-Royce... These companies and many others trust Street Cranexpress to keep their cranes lifting and production lines rolling.

And we'll grow bigger and better too. We're already talking to dozens of household names about how Street Cranexpress can keep their lifting equipment in tip-top condition.

FOCUS ON HEALTH & SAFETY

Excellent, class-leading health & safety practices are at the heart of our business.

As a RoSPA gold award winner, our focus on safety has not only been recognised but rewarded, as this is the highest standard we could achieve.

Our regular internal communication – called the Engineers' Bulletin – highlights key metrics of incidents, accidents, and non-conformance reporting.

We're full members of LEEA, who provide courses and advice on best practice in mechanical handling and lifting environments.

Many training providers are also called upon routinely to keep our engineers and staff up to date on the latest tools, techniques, HSE regulations, and working practices.

STILL A FAMILY-OWNED UK BUSINESS

| **Not just Street Cranexpress, but the entire SCE Group is still a family-owned UK business.**

Along with sister company Street Crane (who build many of the cranes and hoists that we install and maintain) both groups are fully owned by two families in South Yorkshire and Derbyshire.

It's a sociable business too, with charity football matches, golf days, company carnivals, fundraising events, and a fantastic Christmas party.

SCE ACADEMY

Street Cranexpress recognises that experienced crane service engineers are in short supply.

To help nurture new talent, we created the SCE Academy to grow young apprentices into fully qualified engineers.

Working with capable and eager apprentices adds an extra dimension to an engineer's career. You can guide and teach them as they learn electrical and mechanical engineering, health & safety, working at height, planning their day, and so much more.

You could make a real difference to a young person's career – and set them on the path to being an outstanding engineer.

PHONE A FRIEND!

Know someone who'd be perfect as a Street Cranexpress engineer?

You get £250 if they stay with Street Cranexpress more than three months.

Ask them to email recruitment@sce.co.uk to find out more.
