

# Street Cranexpress

## NEWSLETTER

*January - March 2026*

We've had a busy start to the year, with the relaunch of the SCE Academy (with four all-new training experiences no less), Achilles accreditation and some impressive crane modernisation work carried out by our team.

But first...

### The SCE Academy – revitalised and relaunched

The **SCE Academy** has undergone a complete overhaul, boasting **four all-new training experiences**, headed up by a recent addition to the Street Cranexpress family – Ben Cheetham.

Ben has a rich history as a trainer, with over 20 years of experience in diverse industries including the MoD, emergency services, utilities, manufacturing and more.

A dedicated **SCE Academy web page is live**, where you'll find detailed course information, how to book your place and an interview with trainer Ben.

Here's a brief overview of the training courses available to book:

**Electric Overhead Travelling Crane Operation** – *For safe slinging practices and correct crane operation.*

**Inspection of Lifting Equipment Accessories** – *An in-depth look at key inspection requirements, processes, and safety considerations.*

**Slinger Signaller** – *Perfect for those needing to master safe and effective slinging techniques.*

**Crane Supervisor** – *Suitable for operators who supervise routine and non-routine lifts.*

## **Achilles accreditation achieved once again**

# Achilles

**ACCREDITED**

We recently achieved Achilles accreditation, scoring **100% across all assessed areas**, including:

- Health & Safety
- Environment
- Quality
- Sustainability

Achilles is a globally recognised accreditation, used to identify compliant, credible and low risk suppliers. Achieving this accreditation for another year was a real team effort and reflects who we are as a business – committed to safety, quality, sustainability and doing things by the book, every day.

## **Find out how the Street Cranexpress team modernised ageing lifting equipment in a listed building...**

Our team were involved in an interesting project recently – a **full crane modernisation** taking place in a listed building.

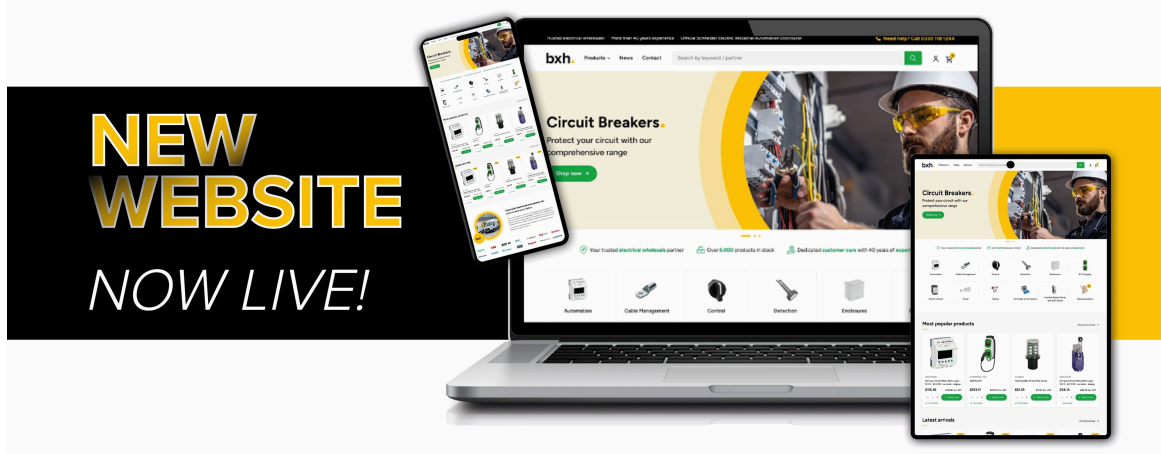

This job was not for the faint-hearted as the team were faced with a number of challenges, the main one being how to carry out works in a historic building and confined space.

You can read all about it in our latest case study, here:
